

SHINGLE RECYCLING

Pricing

Save with Recycling

RECYCLED PRICING	LANDFILL COST
\$25/ton	\$52.00/ton

Benefits of Recycling

REDUCE NEED FOR FOREIGN OIL

Manufactured shingles consist of 40 percent asphalt. Recycling shingles reduced the amount of virgin resources used to make shingles.

REDUCE WHAT GOES IN THE LANDFILL.

Shingles take 400 years to breakdown in a landfill and more than 11 million tons of shingles end up there annually.

REDUCE COST OF PAVING PROJECTS

While a resident may not pay for a road project, they pay for public road projects in one way or another. Recycling your roof helps your local, state and national governments.

BUILDING CERTIFICATION

Qualify for U.S. Green Building Council's LEED credits.
